

Pest Control

Our aim is to provide all our customers with a comprehensive and effective pest control service, with a main focus on:

- Vermin - Rental & Servicing of Baits and Traps
- Insects - Laying and servicing of Chemicals

We carry out a broad range of services for domestic, commercial, agricultural and industrial customers; this can be on a 'one-off' job basis to individually tailored service contracts.

We employ Pest Control Technicians with considerable knowledge and experience, all of whom are comprehensively trained to meet all our customers' requirements. We offer a Free, No Obligation survey to assess your pest control needs. This involves conducting a full inspection of your premises and provide you with a report on our findings which will include recommendations on proofing and housekeeping.
